APPARATUS AND METHOD FOR COUPLING A MODULE ASSEMBLY IN A HOUSING

Abstract of the Disclosure

[0020] An assembly, such as a sensor assembly, includes an optional housing having an inner surface and an outer surface where the housing includes housing connecting features. The assembly further includes a module assembly with at least one resilient member, and an elongate member coupled with the at least one resilient member. The module assembly and the elongate member are disposed within the housing where the elongate member is coupled with the housing with the housing connecting features.
